California Science Test (CAST) for High School

This year, students in high school took part in a field test of the new California Science Test (CAST). When complete, this new test will measure students' understanding of the new California Next Generation Science Standards (CA NGSS), which encompass the core ideas, concepts, and practices in science and engineering that students should master to be ready for college and a 21st-century career.

The field test is meant to evaluate test questions, as well as help students and schools become familiar with the new standards and content.
